Technical Data Sheet

AQ 1003 Aquarius Mesh Degreaser

AQ 1004 Aquarius Mesh Degreaser Concentrate

Description

AQ 1003 - Aquarius Mesh Degreaser is a ready to use gelled solution to degrease all types of new and used screen meshes, prior to the application of Capillary, Indirect Film or indirect photo emulsions.

AQ 1004 - Aquarius Mesh Degreaser Concentrate is a concentrated version of the above product. 1 litre of AQ 1004 added to 9 litres of water will make the equivalent solution of 10 litres of AQ 1003, but will be a liquid not a gel.

Technical Info

Low viscosity
Biodegradable and non hazardous
Emulsifiable with water

Application

Either Mesh Degrease solution should be applied to a wet screen with a soft brush or sponge. Rub the solution into both sides of the mesh and leave for 5 minutes. Wash off with copious amounts of water, preferably with a high-pressure washer until the mesh is free of foam. All excess water should be removed with a vacuum and then allowed to fully dry. Once the screen is dry, the mesh is then ready to receive a new stencil. The screen should be stenciled within twenty four hours of preparation.

Storage

Prevent from freezing. These products are non-hazardous and non-flammable and as such requires no special storage conditions.

Standard Packaging

AQ 1003 - Aquarius Mesh Degreaser is supplied in 1 litre & 5 litre plastic buckets.

AQ 1004 - Aquarius Mesh Degreaser Concentrate is supplied in 1 litre poly bottles.
