Aqua Screen Price List August 2008

Ready to print Inks

Aqua Screen is a range of low cost water based screen printing inks for the decoration of natural and white textiles. Aqua Screen is not suitable for dark fabric. (For printing onto dark textiles with water based inks see Opaque Binder.) Using Aqua Screen the printed garment retains the original soft feel of the fabric when printed through finer meshes. The print becomes washfast and resistant to dry-cleaning when heat or chemically cured. A separate catalyst can be supplied for adding to Aqua Screen to achieve a full cure without heat. (see separate Technical Data Sheet)

		<u>1 x 1 kg</u>	<u>1 x 5 kg</u>
AS 100	Binder	£ 5.00	£20.00
