

Screen Colour Systems

CorriScreen Price List August 2008

Corriscreen has been developed for printing onto corrugated polypropylene products, such as Correx, that has been treated for printability by the manufacturer. Corriscreen will also print onto most other plastics. The ink has excellent screen stability and is suitable for exterior work such as estate agent's boards. Screen Colour Systems offers a colour matching service in this range. The price of this service is £60.00 per colour plus the cost of the ink. Repeat mixings are £25.00 plus the cost of the ink.
