Screen Vin Gloss Price List August 2008

Screen Vin Gloss is a fast drying high gloss screen ink for printing onto PVC plastic film, sheets and mouldings. There is a wide range of bright shades available, which have a high lightfastness and most are suitable for exterior use on rigid or flexible vinyl. Screen Vin inks are self-solvent in the screen and have excellent screen stability, print with excellent definition and will dry rapidly on racks or modular jet dryers, giving a tough hard film with good flexibility and excellent scuff resistance.
